

AMERICAN EXPRESS CODESTREET 2026

Bridge

Real-Time AI- Assisted Dispute Resolution Platform

Transforming chargeback resolution through real-time collaboration, transparent evidence management, and intelligent decision recommendations.

Made with GAMMA

Dispute Resolution Is Broken

Today's chargeback process is slow, fragmented, and opaque — creating friction for merchants, cardholders, and issuers alike.

Scattered communication

Emails everywhere. No shared view.

Manual processes

Documents move by hand.

Slow resolution

Cases drag on for days.

Inconsistent outcomes

Decisions vary by reviewer.

Introducing Bridge

Bridge is a shared workspace where merchants and cardholders collaborate in real time while an intelligent decision engine evaluates evidence and recommends fair resolutions.

Shared Dispute Workspace

A structured space for every party involved.

Real-Time Collaboration

Live updates keep everyone aligned instantly.

Evidence Management

Versioned submissions stay organized and traceable.

Decision Intelligence

AI recommends outcomes with clear rationale.

How Bridge Works

A streamlined, end-to-end workflow replaces fragmented email chains with a structured, collaborative process — from dispute creation to final resolution.

Dispute Created

Parties Join

Evidence Submitted

Real-Time Sync

Each step is tracked, timestamped, and visible to all participants for a transparent, auditable resolution journey.

Core Features

Four capabilities that keep disputes organized, transparent, and decision-ready.

Real-Time Collaboration

Live updates keep all parties aligned throughout the dispute.

Live Evidence Sharing

Documents and records are shared instantly in one place.

Timeline Tracking

Every action is captured in a clear, immutable history.

Confidence Scoring

Each recommendation is ranked by confidence for faster review.

Decision Intelligence Engine

Reason Code + Merchant Evidence
+ Cardholder Evidence

Decision Intelligence Engine

Recommendation

Confidence Score

Explainable Decision

Every recommendation is recomputed using the complete evidence set from both parties, ensuring deterministic and explainable outcomes.

Bridge's decision engine combines structured inputs, evaluates them against policy and precedent, and produces a ranked outcome with a confidence score and a plain-language explanation.

Possible outcomes

Approve Refund

Reject Refund

Partial Refund

Request Evidence

Manual Review

Technology Stack

Built on a modern, scalable architecture designed for real-time performance and enterprise reliability.

Each layer scales independently, helping Bridge support enterprise transaction volumes with low latency and high availability.

Why Bridge Wins

A direct comparison of the traditional dispute process versus the Bridge approach.

Communication Fragmented email chains	Evidence Handling Manual, ad hoc exchanges	Communication Shared collaborative workspace	Evidence Handling Centralized, version-controlled
Transparency Low visibility for parties	Decision Speed Days to weeks	Transparency Full timeline with audit trail	Decision Speed Real-time intelligent recommendations
Consistency Varies by reviewer		Consistency AI-guided, confidence-scored	

Bridge

Building the future of transparent, collaborative dispute resolution.

Thank you.
